

We work with schools throughout Western Australia

We have experience working in education support schools, education support centres and mainstream schools.

We are committed to understanding your school's priorities and can offer a free initial consultation to discuss tailored supports to meet your needs.

"The model of having speech pathologists working alongside teachers and education assistants with students, is ground breaking. Indigo helped teachers change the way they teach, education assistants to become expert AAC users and, most importantly, children to make comments, requests and statements for the very first time."

Linda Lane, Principal, Cloverdale Education Support Centre

Help your students communicate, participate and learn

Our speech pathologists and occupational therapists are respected for their experience, knowledge and skill working with the latest assistive technology and supporting communication in schools.

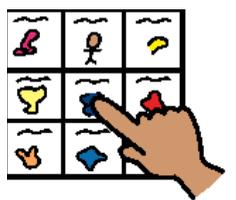

Assistive technology (devices and equipment) can promote students' independence and assist them in reaching their full potential. We have experience working with students with a range of learning difficulties and disabilities.

We aim to understand your current priorities, resources and skills to build a tailored support package to meet your school's needs.

What areas can Indigo's School Service support?

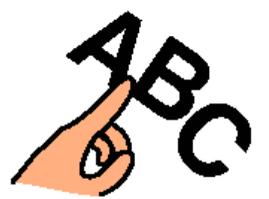

Communication supports (AAC)

Alternate access methods for learning communication and recreation

Literacy support technology

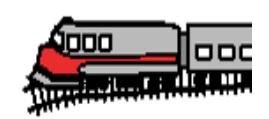

Educational software and apps

Workplace learning supports

Community access and safety

Life skills

Using mobile devices
