

Ginger Tiger is a subscription based website that provides access to hundreds of games under the categories of cause and effect, basic skills, timing, math, speech and language, language arts, new and all games. Within each of these categories you can further filter games for all devices, games for switches and games for eye gaze. Ginger Tiger games cannot be customised however you can choose from different levels of difficulty depending on each student’s needs. New games are added every few weeks.

As Ginger Tiger is web based it requires an internet connection to work. There are two subscription options: a single user license or site license. A single user license is for one device and one student at a time. A site license allows Ginger Tiger to be used on up to 15 devices at the same time. A free 7-day trial is available which provides access to all games within this period.

This resource references the Unlocking Abilities key levels which provide a framework for evaluating a student’s eye gaze skills. More information on Keys to Developing Eye Gaze skills can be found here: <https://indigosolutions.org.au>.
